Author index to volume 195 (1999)

- Acharya, B.D. and P. Gupta, On point-set domination in graphs IV: Separable graphs with unique minimum psd-sets (1-3) 1– 13
- Ageev, A.A., Every circle graph of girth at least 5 is 3-colourable (*Note*) (1-3) 229–233
- Assaf, A.M. and R. Wei, Modified group divisible designs with block size 4 and $\lambda = 1$ (1-3) 15– 25
- Atkins, A.C., G.N. Sarkozy and S.M. Selkow, Counting irregular multigraphs (*Note*) (1-3) 235–237
- Atkinson, M.D., Restricted permutations (1-3) 27– 38
- Balbuena, C., Extraconnectivity of s -geodetic digraphs and graphs (1-3) 39– 52
- Barnette, D.W. and S. Gillett, Paths and circuits in partially directed graphs (*Note*) (1-3) 239–243
- Beasley, L.B., S.D. Monson and N.J. Pullman, Linear operators that strongly preserve graphical properties of matrices — II (1-3) 53– 66
- Bollobás, B., O. Riordan, Z. Ryjáček, A. Saito and R.H. Schelp, Closure and Hamiltonian-connectivity of claw-free graphs (1-3) 67– 80
- Chen, B. and S. Zhou, Domination number and neighbourhood conditions (1-3) 81– 91
- Conder, M., Explicit definition of the binary reflected Gray codes (*Note*) (1-3) 245–249
- de Werra, D. and A. Hertz, On perfectness of sums of graphs (1-3) 93–101
- Dror, M., G. Finke, S. Gravier and W. Kubiak, On the complexity of a restricted list-coloring problem (1-3) 103–109
- Finke, G., see M. Dror (1-3) 103–109
- Fishburn, P.C. and W.T. Trotter, Split semiorders (1-3) 111–126
- Gao, W., On the number of subsequences with given sum (1-3) 127–138
- Gillett, S., see D.W. Barnette (1-3) 239–243
- Gravier, S., see M. Dror (1-3) 103–109
- Gupta, P., see B.D. Acharya (1-3) 1– 13
- Haxell, P.E., Packing and covering triangles in graphs (*Note*) (1-3) 251–254
- Helleseth, T., C. Rong and K. Yang, New infinite families of 3-designs from preparata codes over \mathbb{Z}_4 (1-3) 139–156
- Hertz, A., see D. de Werra (1-3) 93–101
- Kageyama, S., see Y. Miao (1-3) 269–276
- Kingan, S.R., Intersections of circuits and cocircuits in binary matroids (1-3) 157–165
- Kubiak, W., see M. Dror (1-3) 103–109
- Li, J.-S. and Z.-X. Song, On the potentially P_k -graphic sequences (*Note*) (1-3) 255–262
- Li, Y., see Z. Zhang (1-3) 295–298
- Liu, L., see Z. Zhang (1-3) 295–298
- Lou, D., A local independence number condition for n -extendable graphs (*Note*) (1-3) 263–268
- Martini, H. and P. Soltan, On convex partitions of polygonal regions (1-3) 167–180
- Miao, Y. and S. Kageyama, Two classes of q -ary codes based on group divisible association schemes (*Note*) (1-3) 269–276
- Miller, M., see M. Sutton (1-3) 287–293
- Monson, S.D., see L.B. Beasley (1-3) 53– 66
- Muthusamy, A. and P. Paulraja, Path factorizations of complete multipartite graphs (1-3) 181–201
- Oporowski, B., Minor-equivalence for infinite graphs (1-3) 203–227
- Paulraja, P., see A. Muthusamy (1-3) 181–201
